

Getting Started

A test kit* containing one receiver, one pad, and software is available to instructors free of charge when you choose to use CPS in your classroom. Once you decide to implement our response pad system, the pads will be made available to all campus bookstores for \$16 (net).

Student Pricing and Registration

Now, students can access the premier response pad system at affordable, capped prices, making it an excellent value. They also enjoy payment flexibility, because the cost is divided into two parts: purchase of the pad at the bookstore and registration of the pad at the eInstruction website (prices below). Dividing the cost gives students the greatest value, because they pay only for the usage they need.

Students can choose to make a one-time payment to use the pads in all classes and enjoy lifetime access or they can pay a smaller amount for each term they plan to use the response pads. After they reach the price cap, their registration automatically converts to lifetime access, and they may use the pads in all classes at no additional charge.

Student Pricing for RF Pad Registration				
	Standardized university, one-time payment	Standardized university, pay per term	Non-Standardized university, one-time payment	Non-Standardized university, pay per term
Term 1	\$35	\$13	\$50	\$15
Term 2		\$13		\$15
Term 3		\$13		\$15
Term 4				\$15
Total registration fee	\$35	\$39	\$50	\$60

Standardizing on eInstruction pays.

When a professor uses CPS, the total cost to students will depend on whether or not the institution has standardized on eInstruction. Standardizing lowers the price of registration for students, whether they choose one-time or per-term registration.

*Additional receivers may be purchased.
